SUPER STRENGTH MOSS KILL™

CONCENTRATED MOSS, MOULD, LICHEN & ALGAE REMOVER

IMPIREACHT CHEMICALS
SUPER STRENGTH MOSS KILL PRODUCT INFORMATION

Product information and uses:

SUPER STRENGTH MOSS KILL™

CONCENTRATED MOSS, MOULD, LICHEN & ALGAE REMOVER

20 Litres of concentrate makes up to 520 litres of ready to use product

Super Strength Moss Kill is a heavily concentrated quat based moss mould lichen and algae cleaner most commonly used in and around all buildings, factories, farms, dairy sheds and homes.

One 20 litre container of the product makes 520 litres of ready to use product as it dilutes at 1 part product to 25 parts water making it one of the most cost effective kill products on the New Zealand market today.

Super Strength Moss Kill is backed by a 60 day money back guarantee

At Impireacht Chemicals (Empire Chemicals) we have our client's pocket and the environment in mind.

Super Strength Moss Kill is effective a spray on weather off moss kill cleaner suitable for use in all sectors including the dairy sector, commercial applications and the domestic market. It has been specifically designed to meet and surpass the tough cleaning requirements of not only industrial and commercial users, but rural and domestic users also.

Super Strength Moss Kill is most commonly applied using commercial spraying equipment and quality knapsack or garden spray units.

Active Ingredients: Quaternary Ammonium Chloride 50%.

Shake the product well once mixed with water.

DO NOT mix with other chemicals!

MPI approved for use in farm dairies

MPI C36 approved (all animal products except dairy)

Examples of uses for the amazing Super Strength Moss Kill

Super Strength Moss Kill is a specialised product designed for cleaning moss mould lichen and algae from all surfaces including green slime from dairy sheds.

Super Strength Moss Kill Dilutes at a 1 part product to 25 parts of water ratio. Most other moss kill products cleaners are;

1. Sodium Hypochlorite based which are bleach based or chlorine based, they all gas off and deteriorate rapidly and generally only dilute down to a 2-1 ratio, often industry and farmers use these types of products neat or at a 1-1 ratio so as to get better cleaning results.
2. Quat based but only dilute at 1:4 or 1:5 meaning Super Strength Moss Kill's stands head and shoulders above its competitors due to its 1:25 dilution rate. In short consumers save significantly as the costs relating to storage, manufacturing,

packaging and shipping are minimised by 4 times compared to our average competitor and we pass these significant savings onto our customers.

Super Strength Moss Kill cannot deteriorate even when mixed with water.

Super Strength Moss Kill cannot eat the seals out in your pressure sprayers.

Super Strength Moss Kill cannot bleach your clothing or overalls.

Super Strength Moss Kill cannot kill the root systems of your plants unlike bleach.

Super Strength Moss Kill simply stands head and shoulders above most if its quat based and sodium hypochlorite/chlorine-based competitors in every way; we believe everyone should be using Super Strength Moss Kill.

By using true concentrates which is Impireacht Chemicals core focus collectively we can do our part by reducing plastic waste and fuel costs, both of which damage the environment significantly.

Super Strength Moss Kill's uses and dilutions:

Below are examples of surfaces Super Strength Moss Kill moss, mould lichen and algae remover can safely be used on or applied too, always be sure to read the instructions thoroughly before opening or using the product;

- Tennis Courts
- Terracotta tiles and pots
- Weatherboard Houses
- Wooden Decking – Every type of wood
- Yacht Sails

Super Strength Moss Kill is the environmental choice in moss killers due to its generically superior concentration.

Super Strength Moss Kill moss, mould, lichen and algae remover is simple, safe and easy to use. It has been specifically designed to effectively remove and control the continuous growth of moss, mould, lichen and algae, when used as recommended Super Strength Moss Kill is effective on most washable surfaces.

Please Note: Super Strength Moss Kill is a time release product and will not show immediate results. It works slowly and effectively without damaging the surface it is applied too. Some moss, mould, lichen and algae may take up to four weeks to show signs of decay. Staining on hard surfaces may occur, for instance, black mould in concrete can often turn an orange colour once you apply the product, especially if you apply the product on a scorching hot day, this staining will weather off.

Shake the product well once mixed with water.

Apply to the required surface or contaminated area thoroughly, where growth is heavy, apply to the point of runoff. Reapplication will be necessary for heavy growth.

Always rinse your spray unit thoroughly with water following use to avoid mixing the solution with other sprays you might be using your spray unit for.

Area coverage will vary depending on growth and the type of surface you are cleaning. The diluted ready to use solution will treat up to 5 square metres per litre on porous surfaces and up to 10 square metres on non-porous surfaces.

DO NOT mix with other chemicals!

DO NOT apply if rain is expected within 12 hours.

DO NOT allow the product to contact the foliage of your plants or your animals.

Super Strength Moss Kill is not to be used for any purpose or in any manner contrary to the label unless authorised under appropriate legislation.

Product Descriptions and MPI approval status table

SKU	Product description and MPI approval status
5LP	5 litre pump for hand cleaner and any other concentrate
PP20	20 litre purging pump similar to 200 litre drum pump
DP200	200 litre drum pump to fit 200 litre vertex drum
SSMK5	5 litre Super Strength Moss Kill = 1-25 = makes 130 litres of RTU prod. Recognised for use in dairy processing MPI C36 approved (all animal products except dairy)
SSMK20	20 litre Super Strength Moss Kill = 1-25 = makes 520 litres of RTU prod. Recognised for use in dairy processing MPI C36 approved (all animal products except dairy)
SSMK200	200 litre drum Super Strength Moss Kill = 1-25 = Makes 5200 litres RTU. Recognised for use in dairy processing MPI C36 approved (all animal products except dairy)
SSMK1000	1000 litre IBC Super Strength Moss Kill = 1-25 = Makes 26000 litres RTU. Recognised for use in dairy processing MPI C36 approved (all animal products except dairy)
